## FUNDAMENTALS

Datatypes	Flow Control	Functions	File Handling	Object & Class
Numbers Strings Lists Dictionaries	If Else For While Continue	Definition Function Call Docstring Return	Reading Writing Editing	Variables Functions

# Conceptos Data Science

# Conceptos: Data Science, Business Analytics

## Data Science

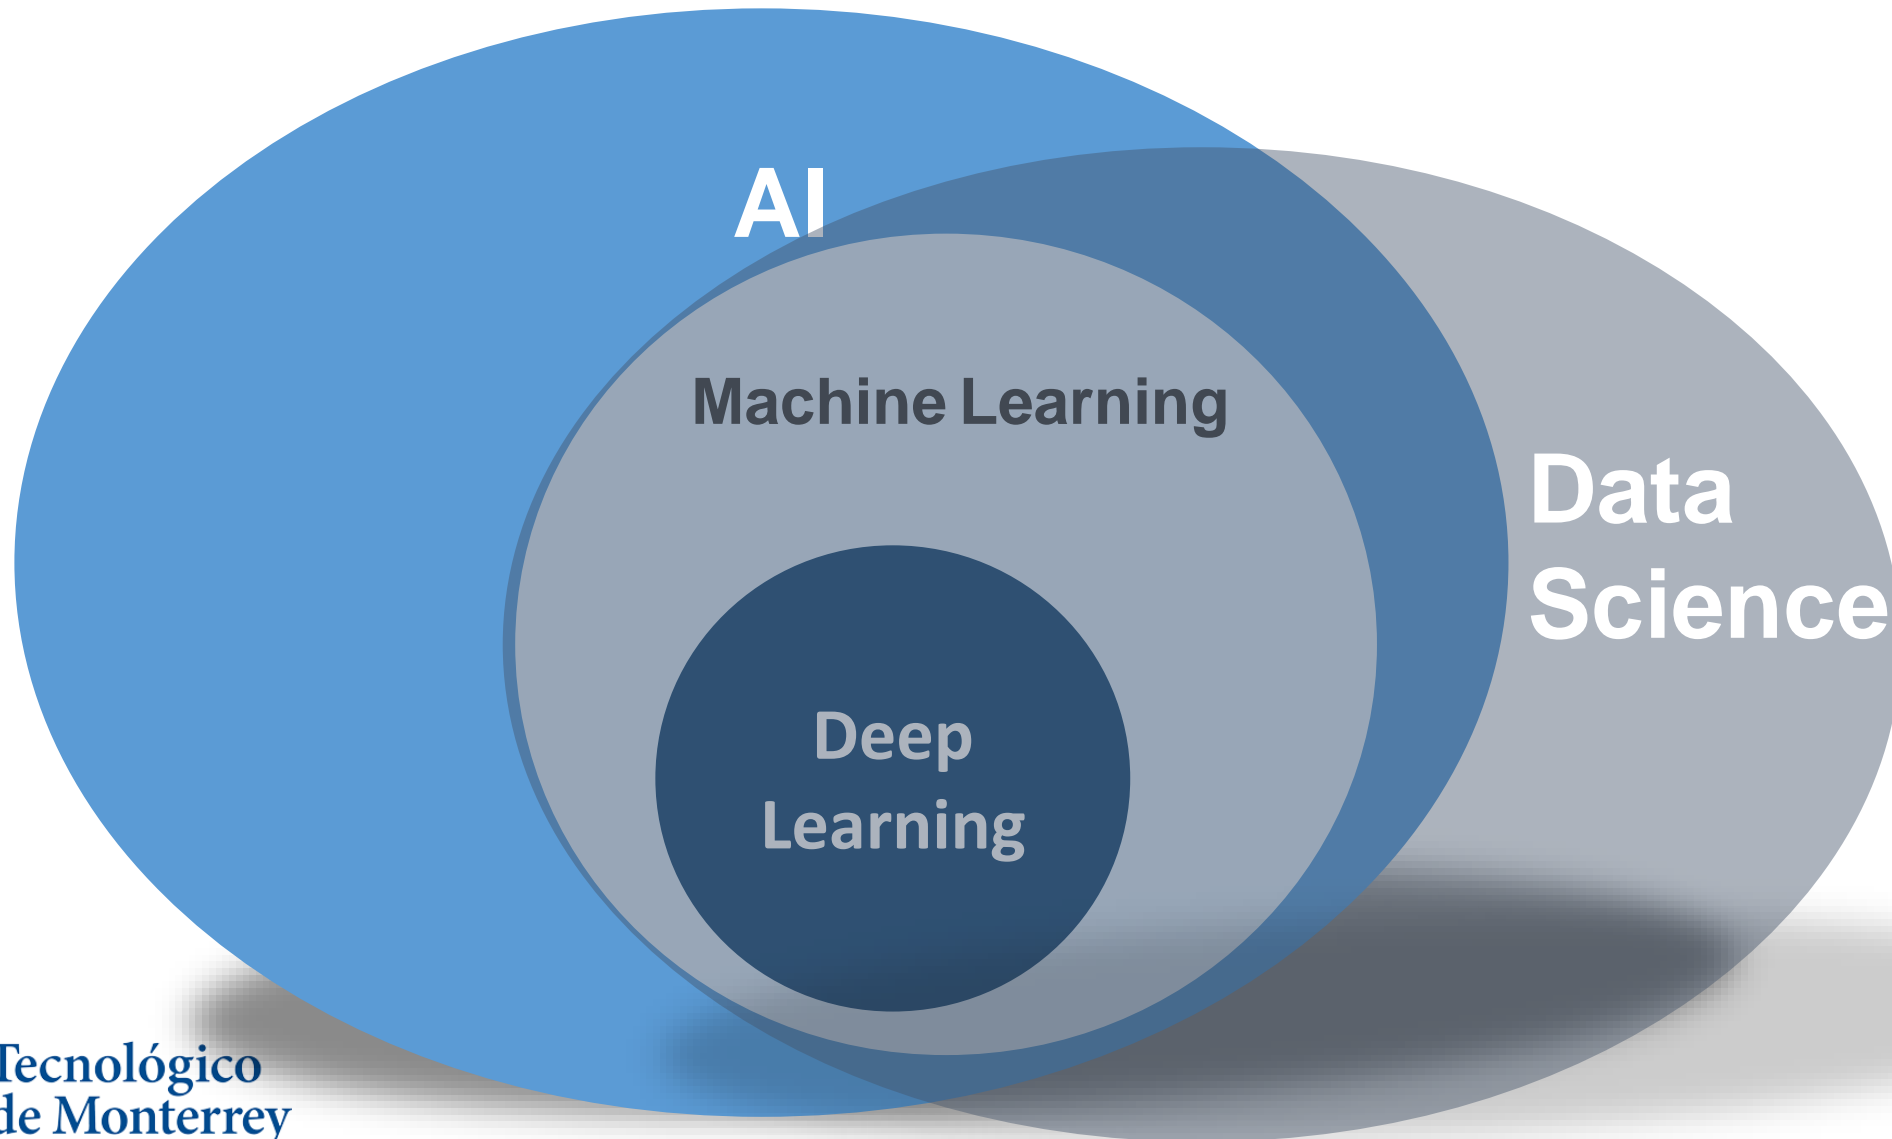

DJ Patil and Jeff Hammerbacher who were working in LinkedIn and Facebook respectively, first coined the term Data Scientist in 2008.

## Business Analytics

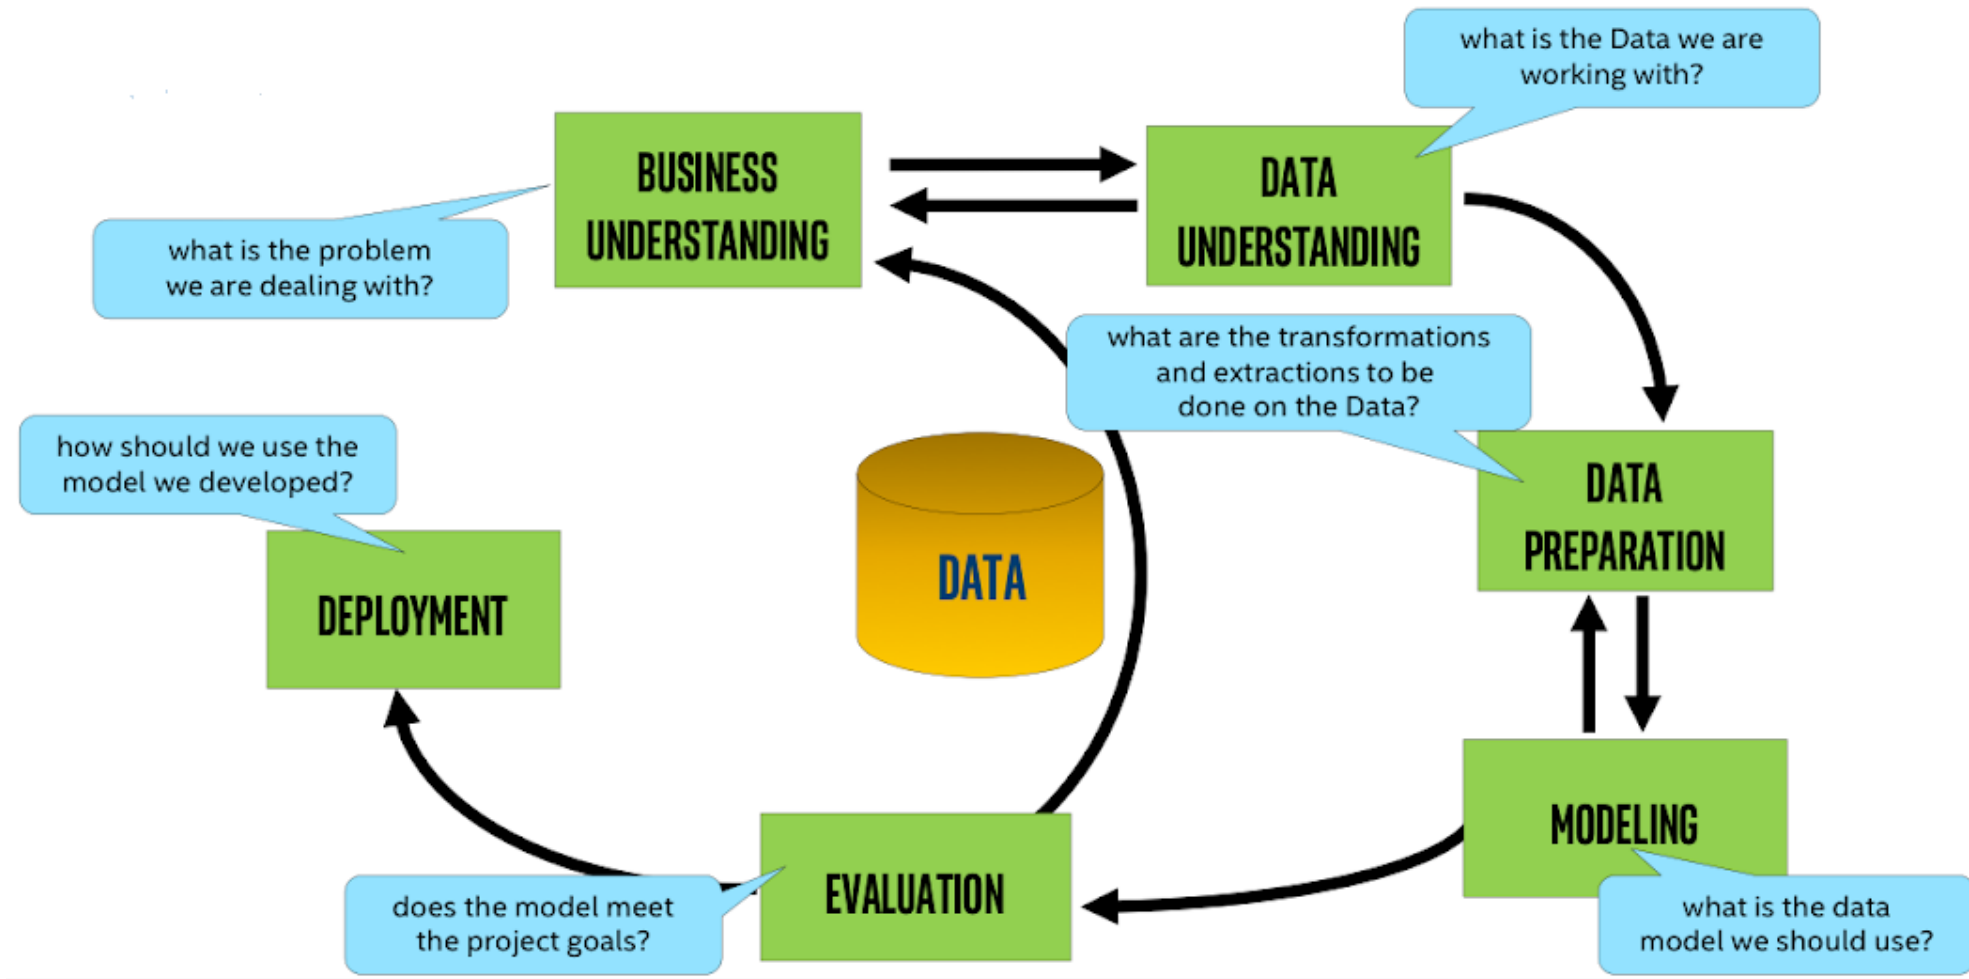

Business Analytics has been used since the late 19th Century when it was put in place by Frederick Winslow Taylor.

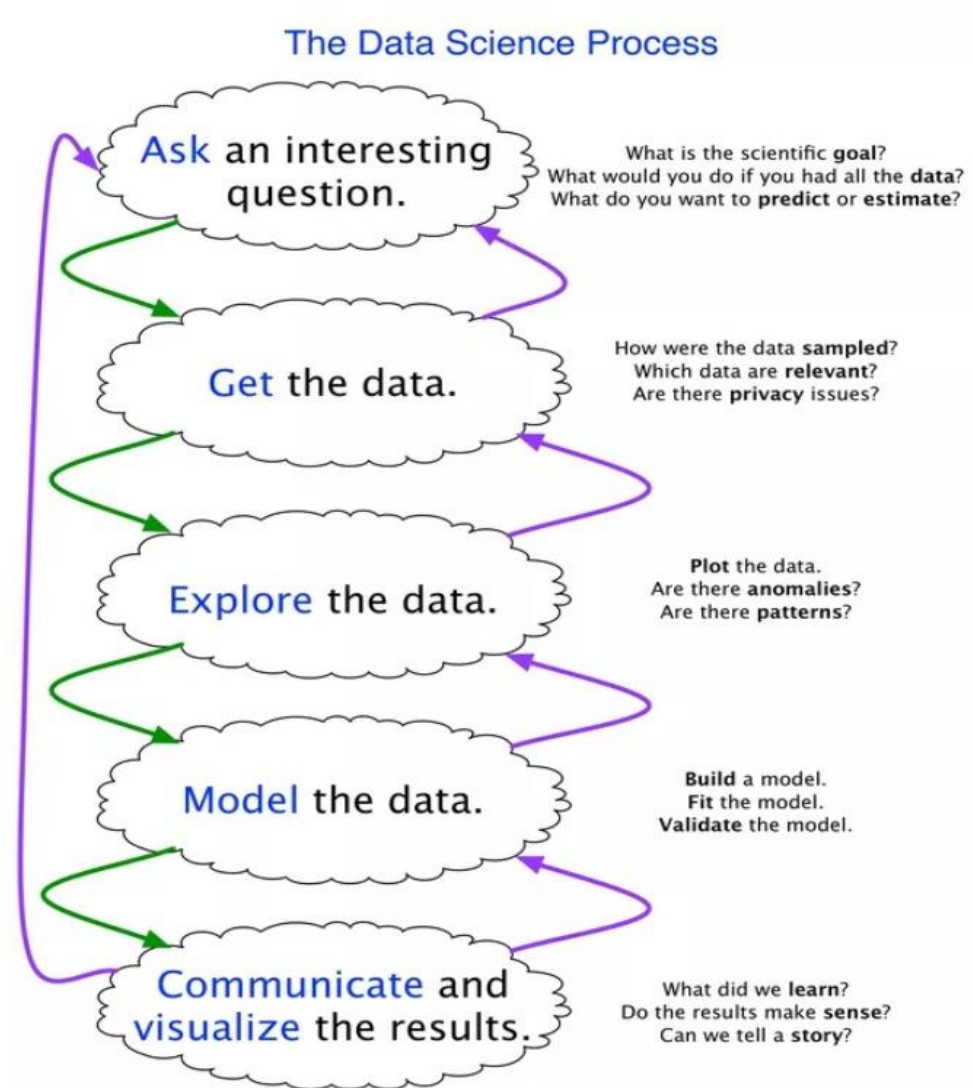

# Conceptos AI, Machine Learning, Deep Learning, Data Science

# Conceptos: Data Science ¿Cómo se trabaja? Metodología CRISP

# Conceptos: Data Science, ¿Porqué es Ciencia?

Joe Blitzstein and Hanspeter Pfister, created for the Harvard data science course <http://cs109.org/>.
